

Abdelrahman Sayed

Data Engineer

[+201025210619](tel:+201025210619) | Abdelrahman6971@gmail.com | linkedin.com/in/Abdelrahman-Sayed | Cairo, Egypt

SUMMARY

Data Engineer with a strong foundation in Python, SQL, data engineering, ETL/ELT, and big data technologies. Knowledgeable in designing data pipelines, data integration, transformation, and cloud-based data solutions using Microsoft Azure, Azure Data Factory, Azure Databricks, PySpark, and Delta Lake. Familiar with Hadoop, Kafka, Hive, PostgreSQL, and modern data engineering practices. Currently developing practical skills through hands-on projects, technical training, and a capstone project, with a strong interest in building scalable and reliable data solutions.

EXPERIENCE

Microsoft Data Engineer | Digital Egypt Pioneers Initiative

Jul 2026 – InProgress

- Completed specialized training in Prompt Engineering, Introduction to Data Engineering, Programming Essentials, SQL & Database Management, and Advanced Python for Data Engineering.
- Developed knowledge of data pipelines, big data processing, Microsoft Azure data engineering, deployment, and AI applications for data engineers.
- Participating in a capstone project applying data engineering concepts and technologies in an end-to-end practical solution.
- Developing freelance-ready skills through coaching on Upwork and Mostaq, including task acquisition, client communication, proposal preparation, and client negotiation.

Big Data Trainee | National Telecommunication Institute

Jul 2026 – InProgress

- Currently completing an intensive 294-hour program covering the full big data engineering stack, from Linux and Python fundamentals to enterprise-grade big data technologies (Huawei HCIP Big Data track).
- Built scalable batch data pipelines using Apache Spark and PySpark.
- Worked with Hadoop ecosystem components including HDFS, Hive, Kafka, and YARN.
- Designed data processing workflows following modern data engineering best practices.
- Developed cloud-based data engineering projects using Azure technologies.

Data Engineer Intern | Fingerprint Consultancy

Aug 2023 – Nov 2023

- Designed and developed end-to-end ETL pipelines using Azure Data Factory and Azure Databricks.
- Integrated data from multiple structured and semi-structured sources into Azure Data Lake Storage Gen2.
- Performed data transformation and validation using PySpark and SQL to ensure high-quality datasets.
- Implemented Medallion Architecture (Bronze, Silver, Gold) for scalable data processing.
- Managed secrets securely using Azure Key Vault; worked with Delta Lake and Unity Catalog for data governance.
- Collaborated with stakeholders to deliver reliable datasets for reporting and analytics.

EDUCATION

Bachelor of Computer Science and Information Systems | High Institute of Computer Science and Information Systems, 6th of October City

Jun 2020 – Jun 2024

TECHNICAL SKILLS

Programming Languages: Python, Java, SQL

Data Engineering: ETL, ELT, Data Warehouse, Data Modelling, Integrity, Validation, and Quality

Big Data: Hadoop, HDFS, Apache Spark, PySpark, MapReduce, YARN, Kafka, Hive, HBase, NiFi, Sqoop, Flink, Flume, Elasticsearch, and Airflow.

Cloud: Microsoft Azure, ADF, Azure Blob Storage, Delta Lake, Snowflake

Databases: MySQL, PostgreSQL, SQL Server

Version Control: Git, GitHub

CERTIFICATIONS

Red Hat System Administration I (RH124-RHA) – Red Hat Academy | [Link](#)

Aug 2026

Data Engineer in Python – DataCamp, [Verified Certificate](#)

Jan 2026

Associate Data Engineer in SQL – DataCamp, [Verified Certificate](#)

Dec 2025

LANGUAGES

Arabic: Native

English: B2 – Upper Intermediate
